Timely Suggestions to CENTENNIAL TRAVELERS.

Delays are dangerous. It is well to reflect that circumstances of a grave nature may inter-vene between us and the next Centennial. But while making active preparations to visit the Grand Estibition let us first consider what are the essentials to a comfortable trip, "a compac the late Wesleyan Methodists, are be necessary for the public welfare. Steadfastness is certainly a great to all who intend seeing the wonder of the ige. But the sum of the whole matter is con-nined in "a perfect knowledge of the route." San Francisco, October 20th, '76. ED. REPUBLICAN:-We are having most beautiful weather, crops of all kinds throughout the Pacific Coast are good, and the country, generally speak. ing, is in a prosperous condition. The Stock Market (Mining) has been somewhat depressed for a few weeks, but it s only a matter of time when that will be all right. Edwin Booth is playing a successful engagement at the California Theater, and it we Western people are judges, he is a trump in therele of a tragedian. The 9th inst. was San-Francisco's Centennial Anniversary, which was appropriately celebrated on the 8th under the auspices of the Catholie Church. San Francisco was first settled : y a band of Missio: a: es on the 9th day October, 1776, and some of the adobe buildings erected at that time, are yet prominent land marks of the City; among the most important of which is the Church, which has been constantly occupied from that time to the present, and is now in a good state Public Speaking on Saturday next. of preservation. Come out, tion of Military, &c., &c., which, one half miles in length, and, to say He will also address his fellow the least, presented a grand appear-

ance. And now, if you will indulge evening, at candle lighting. Hon. me, I will attempt to hash up a little POLITICS. So far as the Presidential contest is posed of three States, viz: California, which numbered about 1,200 people and Oregon and Nevada, and the population is woefully mixed. Mining is the leading industry in the State of Nevada, and as a Silver producing Country, it has no equal. The miners are Americans. English, Germans, Welch and, occasionally, a representative of some Demogratic Lack of Principles and other nation. As a whole they are intelligent, industrious, energetic and have this immense Hall leased for the law abiding, people. In politics there campaign, which is always open. On has often local questions sprang up in that state that have settled the destinies of candidates for office, and caused the honors to be divided between the different political parties. But in all cases where the issues have been entirely political, the state has go e Republican, and as they have no local issues to settle in this contest, it is safe to estimate that it will give Hayes & Wheeler its sists of music by the band, addresses by three electoral votes by a handsome majority. The State of Oregon, also, has three electoral votes to be commanded by either one party or the other. The heard Sheridan's ride recited at a Demprincipal business of that state is agriculture, and I am sorry to say that as a class, the people do not equal the miners of the state of Nevada in energy, industry and intelligence. There are many people in that state who emiit, jealousies have been excited, and the natural tendency to a reaction is felt which always follows great events which excite strong feeling. All these, with the natural fickleness of that class will vote the Democratic ticket that still retain the prejudices they that class will vote the Democratic ticket wings at full length as it to say "Hur- ryville, where he resides. some men, have contributed to swell the ranks of the opposition. Unreasoning reactions of public sentiment that there is However, it is evident that there is slowly a revolution going on there in at a rapid rate. As a necessity in formthe minds of the people and it is to be hoped that it has sufficiently advanced to defeat the Democracy in the near riation of purpose, to pursue what approaching contest. California boasts on the fullest reflection is deemed to of various branches of industry, viz: approaching contest. California boasts Agriculture, Horticulture, Mining, Manufacturing, Commercial, &c., &c. which forms a combination of different terests, and affords occupation for the energetic, industrious, and intelligent, class of almost all branches of business. Politically, we, like the state by reactionary tendencies and the dead principles of that old party which played its great part in the history of the country and culminated under the lead of Southern politiciaus in the Lost Cause.— Speech of Walson and the Republicans ranks to cause distinct at Field. and solid as Gibraltar. At the state election one year ago, the Republican party

was divided, and the Democrats being

of inferior men. Their tactics on the stump is to slander and abuse the present administration, and brand Republicans generally as pilferers and thieves, And off the stump, to publish low, dirty, vulgar, slandering, campaign newspapers ; to break up Republican meetings, and to urge Foreigners to vote whether legal or not. They are now naturalizing an average of one hundred Foreigners per day in this city, all of whom will vote the Democratic ticket, The Republican party here is composed of but one element, viz: The loyal, intelligent, law abiding citizens of all classes of trade and industry, and who are being led to victory by the most able statesmen and orators, of good standing and unblemished reputation, that the State affords. Their tacties are simply to discuss fairly and manly. They publish no dirty campaign newspapers, nor try to break up Democratic meetings by mob force.

Both parties are well organized in evcry county and town throughout the State, and the contest is already at boiling heat. San Francisco is expected to poll about 28,000 votes at the coming election, which is about one fourth of the vote of the State, and in all reason able probability, as San Francisco goe so goes the State. Therefore both parties are alive to the fight. They each have enthusiastic organizations in every Ward in the city. The Democratic ward clubs are centered in one main club, called the "McClellan Legion," under the auspices of which they arrange for Mass - Meetings, Torchlight Processions, &c. Their Mass Meetings are usually large and enthusiastic. They have had one Torchlight procession was rather imposing. The Republican nd or ganization called the "Hayes Invincibles.", Horticultural Hall is located in a central part of the city. It is about 250 feet long by 1000 feet wide, with a gallery on each side and will hold about 5,000 people. The "Hayes Invincibles" Tuesday evenings regular meetings are held. The officers of the club devote their entire time to its business. It has one good Brass Band engaged for the season, and a glee club composed of tour ladies and four gentlemen, all first class vocalists. Programmes are distributed to the audience at each Friday evening entertainment, which conable orators, campaign songs by the glee club, and recitations by prominent lady elocutionists.
